### Product Description and Applications

The original ceresin waxes were derived from ozokerite waxes. Today ceresin waxes are purchased for their physical features rather than their chemical characteristics. Ceresin wax consists of high molecular weight saturated and unsaturated hydrocarbons. Paraffin waxes are incorporated to give consistent performance.

### Chemical Properties

|                                  |         |
|----------------------------------|---------|
| Melt Point, °C                   | 67 - 71 |
| Saponification Value, mg KOH / g | nil     |
| Acid Value, mg KOH / g           | nil     |
| Penetration at 77/100/5          | 8 - 14  |
| Iodine Value, gJ2/g              | 7 - 9   |
| Color                            | White   |

### Packing and Shelf Life

CIRASHINE CS has a shelf life of at least five years.

This product is available in 60 lb (27.22 kg) cartons.
